Subject: Dryer Pond Pile to be Moved, Price River Terminal, LLC, Wellington Prep Plant,  
C/007/0012

Dear Mr. Collins:

The Division received your request for moving the Dryer Pond subsoil pile on April 7, 2014. As we have discussed, the Division approves your request to move the pile to accommodate the approved railroad track expansion project. We also recognize that a portion of the pile may be used as fill but that alternative borrow material needs to be identified to replace what is used.

Because of the confusion regarding the volume of the material involved, the Division requires that you provide an as-built statement of the volume remaining in the pile and a commitment to test the remaining material, as it may be the best available in the permit area. Depending on the amount of movement, you may also need to revise your map to reflect the accurate location of the remaining pile. These as-builts must be submitted to the Division by June 6, 2014.

If you have any questions please call me at (801) 538-5325.

Sincerely,

Daron R. Haddock  
Coal Program Manager
